PORTFOLIO

ABOUT US

Affintexfinance is a technology company founded in 2021. Affintexfinance adopted cryptocurrency at an early stage of the company but dived fully into Cryptocurrency investment in the year 2022.

Affintexfinance is developed under the control of an experienced team of highly qualified financial experts, analysts, and professional traders for realistic profitable online investments.

With a robust infrastructure and talented investment professionals, Affintexfinance offers clients the scale of a large asset management firm, with the benefits of a versatile investment platform - flexibility and customization. Our firm is able to offer institutional and retail investors the essential building blocks for today's changing investment landscape. We fully acknowledge that management is an integral part of a company's success and that a strong management team is essential to achieving a company's full potential. Therefore we employ the best brain and ability in our work system.

We empower management so they take full responsibility for proposing and executing the agreed strategy and for the operation of the business as a whole. We employ various financial techniques to achieve the set goals for our clients.

We challenge management to set high ambitions, support them in achieving our common goals, and recognize their contribution with substantial financial rewards.

CRYPTOCURRENCIES

Cryptocurrencies are sets of software protocols for generating digital tokens and for tracking transactions in a way that makes it hard to counterfeit or re-use tokens. Therefore, cryptocurrency trading involves trading on digital currencies/tokens. This form of trading has in fact only been around for a few years.

One of the most common forms of digital currency is the Bitcoin which was released in 2009. It's initial price was set at less than 1 cent as at 2010.

While it is still to experience its boom phase, it has quickly become a popular way of trading for many.

One of the big benefits of this form of trading is the money that there is to be made. The bitcoin, for example, hit a market cap of \$160 billion by November, 2017.

There are considerably a few people trading cryptocurrencies which is an advantage because the market is yet to be saturated by others trying to get in on the game.

Deutsche bank has shown an increasing appreciation for the transformative potential of both blockchain technology—becoming one of the first to spearhead the development of its own Ethereum-based blockchain—and the cryptocurrencies based on it.

Just like Deutsche bank, Germany offers forex broker service, we also have cryptocurrency traders that specialize in the trading of this digital cash. Our job is to test them all out, put them through their paces and then present our information, for better result.

FOREX TRADING

Forex or Fx is an acronym of Foreign Exchange and Forex trading means to trade on this market. Trading takes place by predicting how one currency performs against another in a Forex pair.

It is the largest market in the world with average daily trading volumes exceeding trillions of dollars.

For those who know what they are doing, Forex trading can be very profitable activity although it doesn't come without risks. To get the best out of your trading experience. It is critical that you choose a Forex platform/broker that can offer you everything you need from demo platforms to educational tools.

Selecting the right broker can be a time-consuming process. Who do you choose and why? What do you look out for and how do you know that the company/broker is safe? That is where we come in. Our team of experts scour the internet reviewing and rating all of the markets, so that we only present you with the best of them. It is then up to you to make an informed decision as to how much to invest

LOANS

Getting a loan doesn't have to be intimidating, with the right lender it can be a simple process. You only need a lender committed to taking the mystery out of the mortgage loan process! At Affintexfinance Financial Services, BFS we understand! Our investors want simple facts, honest answers and competitive products.

BFS automatically offers loan services to investors with over \$100,000 investment either in our normal Affintexfinance Financial Services packages or the NFP plans. Investors over \$100,000 are entitled to loans of \$500,000-1million dollars yearly with 5% paid monthly, or the investor could wish to compound the interest till the time limit, provided all required information and identity of the investor are duly confirmed by the Affintexfinance loan board.

Every investor above \$100,000 is provided with a personal account manager and the investor has a direct communication with the manager in order to see that our loan offers are secured.

NON FARM PAYROLL (NFP)

The Non-farm payrolls report is one of the most anticipated economic news reports in the forex markets. It is published the first Friday of the month at 8:30AM Eastern time by the U.S. Bureau of labor statistics. The data release actually includes a number of statistics, and not just the NFP(which is the change in the number of employees in the country, not including farm, government, private and non- profit employees.). Another metric included in the data release is the unemployment rate.

As one of the most anticipated economic news events of the months, Integrated Binary Options Services focus mainly on currency pairs(especially those involving the U.S. Dollar) and typically see big price movements in the minutes and hours after the data is released. This makes it a great opportunity for our traders with a sound strategy to take advantage of the volatility.

HEDGE FUNDS

Hedge funds Hedge fund Marketplace. An online version of a traditional capital introduction program designed to allow Hedge Funds who use CIS as their principal Investing.

ESCROW SERVICE

Escrow is a legal concept in which a financial instrument or an asset is held by a third party on behalf of two other parties that are in the process of completing a transaction. The funds or assets are held by in escrow until it receives the appropriate instructions or until predetermined contractual obligations have been fulfilled. Money, securities, funds and other assets can all be held in escrow.

A close-up photograph of a person's hands typing on a laptop keyboard. The person is wearing a blue long-sleeved shirt. The laptop is silver and is open on a wooden desk. The background is blurred, showing a white wall and a window. The image is framed by a blue border on the left and bottom sides.
